PROFESSIONAL SUMMARY

Frontend Web Developer with 3 years of experience building responsive, production web applications using React.js, Next.js, and TypeScript. Skilled at converting Figma designs into pixel-accurate, interactive UI, integrating REST APIs, and delivering full-stack features with Node.js, Express, and MongoDB. Comfortable configuring Vite/Webpack build tooling and working across the stack to ship features end to end.

TECHNICAL SKILLS

Languages & Core: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Redux & Redux Toolkit, Tailwind CSS

Tooling & Build: Vite, Webpack, Git & GitHub, npm

Backend & Data: Node.js, Express, MongoDB, RESTful API design & integration, JWT authentication

AI-Assisted Development: Claude, ChatGPT, Gemini for AI pair-programming & code generation; Model Context Protocol (MCP) for agentic workflows

Practices: Responsive & mobile-first design, Figma-to-code, code review, Agile workflow

WORK EXPERIENCE

Frontend Developer — Blend Company Oct 2024 – Present

Built and maintain the company's main marketing website and two internal tools (Order Manager, Business Manager) using Next.js and Tailwind CSS.

Converted Figma designs into fully responsive, interactive interfaces, improving design-to-code turnaround and visual consistency across pages.

Integrated frontend components with backend REST APIs to deliver seamless, real-time functionality across internal systems.

Full Stack Developer — APT International Jan 2024 – Present

Develop and ship scalable web applications end to end using React.js, Next.js, Node.js, Express, and MongoDB.

Configure and maintain Vite/Webpack build pipelines to optimize bundle size and development workflow.

Write clean, maintainable code following team coding standards; conduct code reviews, debugging, and troubleshooting across the stack.

Optimize applications for speed, scalability, and performance; stay current with emerging frontend tooling and practices.

PROJECTS

APT International
Corporate website and partner portal for a global industrial tools distributor, organized by industry vertical (construction, automotive, manufacturing, woodworking, oil & gas, water solutions) with a distributor directory and downloadable product catalogues/brochures. Built and maintain the product catalog covering 701 products (1,485 variants) across 218 categories and sub-categories.
Technologies: Next.js, Node.js, Express, MongoDB

Alex Progress
Full-stack corporate platform for an industrial tools & solutions distributor, with a public site presenting sectors, brands, and company info, plus an admin panel for managing products, categories, and brands with AWS-backed image storage for performance and reliability.
Technologies: Next.js, Tailwind CSS, Redux Toolkit, Node.js, Express, MongoDB

APT Cloud
Secure, user-centric full-stack platform giving authorized users access to a digital asset library of 1,175+ items (709 images, 235 user manuals, 115 videos, plus action shots, posters, brochures, catalogues, and spec cards), with JWT authentication and an admin panel for data and user management.
Technologies: React.js, Vite, Redux Toolkit, Node.js, Express, MongoDB

Workline
Enterprise workforce management platform for streamlining HR operations for 322+ employees — attendance tracking across 1,700+ records and 120 biometric devices, 3,290+ leave/special requests, a 70-vehicle fleet module, performance tracking, and payroll processing in one secure system.
Technologies: Next.js, Node.js, Express, MongoDB

FavBio
Personal link-in-bio SaaS product letting creators share all their links and socials from a single customizable page, with drag-and-drop link management, 20+ themes, click/view analytics, and branded QR code generation.
Technologies: Next.js, React, Node.js, Express, MongoDB

Orlisse
Full-stack e-commerce platform for a jewelry brand, featuring a mobile-responsive storefront with category browsing (rings, necklaces, earrings, and more), wishlist and order tracking, curated collections, and a newsletter/promotions system.
Technologies: Next.js, Redux Toolkit, Node.js, Express, MongoDB

Blend Website
Public, bilingual marketing website for Blend, a SaaS platform for restaurant and retail merchants, featuring secure login to Blend systems, dynamic SEO-friendly blogs, and a responsive, user-focused design.
Technologies: Next.js, Tailwind CSS

Blend — Order Manager & Business Manager
Built the internal Order Manager and Business Manager dashboards for Blend, a SaaS platform letting restaurants and retail merchants manage orders from multiple delivery apps (e.g. Jahez, HungerStation) in one place — covering order tracking, inventory/catalog sync, and business analytics.
Technologies: Next.js, Tailwind CSS

EDUCATION

B.Sc. in Information Systems — Future Academy
Graduated 2021 · Grade: Very Good_

COURSES & CERTIFICATES

Web Development Professional Track — Egypt FWD & Udacity [View Certificate]
Intro to JavaScript, JavaScript & the DOM, Web APIs & Asynchronous, Foundations of Agile.

React: The Complete Guide — Udemy [View Certificate]
Components & React state, hooks, custom hooks, useContext, React Router & Redux, testing and performance.

Problem Solving (JavaScript) — HackerRank [View Certificate]
Certification test for JavaScript problem solving.
